SUMMARY

Third-year B.Sc. Software Engineering student at SCE with academic excellence, including the **Rector-President's Award for Excellence**. Experienced as a Teaching Assistant, with prior research experience, strengthening my ability to analyze code, identify issues, evaluate software quality, and solve technical problems. Seeking junior software development, backend, or QA automation roles, with exposure to Agile workflows, Git/GitHub, Docker, and CI/CD concepts.

EDUCATION

Bachelor of Science (B.Sc.) in Software Engineering

SCE - Shamoon College of Engineering • Current score 95

2023 – Present

- Rector-President's Award for Excellence
- Certificate of Excellence for High Entrance Scores
- German Israeli Autumn School Exchange Program Participation Certificate
- **Relevant Coursework:** OOP, Advanced OOP, Data Structures, Algorithms, Computer Networking, Database Systems, Software Requirements, Project Management, Operating Systems, Principles of Programming Languages.

P.Eng - Practical engineer in Electronics and Computer Engineering

ORT Colleges • Final score 95

2019 – 2021

- Studies in the Electronics and Computers major and received a certificate in Electronics and Computers Engineering - Electronic Systems.

EXPERIENCE

Teaching Assistant

SCE — Shamoon College of Engineering

2026 - Present

- Reviewed and graded programming assignments in Python, Java, and C++, focusing on correctness, abstraction, and software design.
- Provided structured feedback on object-oriented programming, debugging, and code organization.
- Identified recurring design and implementation issues and guided improvements across student codebases.

Research Assistant — Data Analysis & Machine Learning

SCE - Shamoon College of Engineering

2025

- Analyzed biological time-series movement data from CSV files to support fly age-group prediction.
- Built PyTorch deep learning models and improved an existing movement-tracking pipeline through feature engineering and training optimization.
- Collaborated with biology researchers to translate domain insights into meaningful ML features and validate results against labeled data.

PROJECTS

Nomad Protocol: AETERRA (Unity/C#)

[GitHub Repository](#)

- Developing a modular Unity/C# top-down shooter with reusable systems for combat, weapons, enemy AI, damage handling, hit detection, object pooling, and audio/VFX.
- Designed gameplay systems with separation of concerns, state-based behavior, iterative debugging, and technical documentation to support maintainability and scalability.

Dungeons & Dragons-Inspired Java Game

[GitHub Repository](#)

- Developed a co-op Java RPG as part of an advanced OOP course, featuring grid-based combat, multiple player classes, and dynamic world events.
- Applied object-oriented design and multithreading to support gameplay systems, combat logic, and event handling.

SKILLS & ENGINEERING PRACTICES

Programming Languages: Java, Python, C++, C#

Backend & Databases: REST APIs, CRUD API design, PostgreSQL, SQL, Spring Boot

QA & Testing: Qase, test cases, bug reports, unit testing, integration testing, debugging, edge-case analysis

Product & Engineering Practices: Agile, Scrum, Jira, user stories, requirements analysis, SDLC, UML, technical documentation

Tools & DevOps: Git, GitHub, Docker, Docker Compose, GitHub Actions, JetBrains, VS Code

Languages

Hebrew - Native

English - Proficient

French - Proficient
